Dear Sir or Madame,

In response to the advertisement for post of sales agent in Delo, January 4th 2003, please consider my application in your search for a Mechanical Engineer.

My personal information is as follows: I was born on January 26, 1978. I graduated from Litostroj Secondary School of Mechanical Engineering in 1994. During my stay in secondary school I also received a grant from Adria Airways, the national airline. I worked there for six months, in the area of aircraft maintenance. Later on I entered Faculty of Mechanical Engineering, University of Ljubljana, from which I graduated in September 2002, with specialization in internal combustion engines. I have not done my military service yet. I speak English fluently and have a vast knowledge of Windows operating system and appurtenant software. My hobby is closely related to my professional education, since I like to indulge myself in motor racing now and then.

If there are additional application procedures, please advise me. Thank you for your consideration.

Sincerely,

Klemen Avguštin
